

SPECIFICATION

Name	Fine Surface / Normal Surface Rubber Tiles
Dimension	500 mm X 500 mm
Thickness Available	25 mm

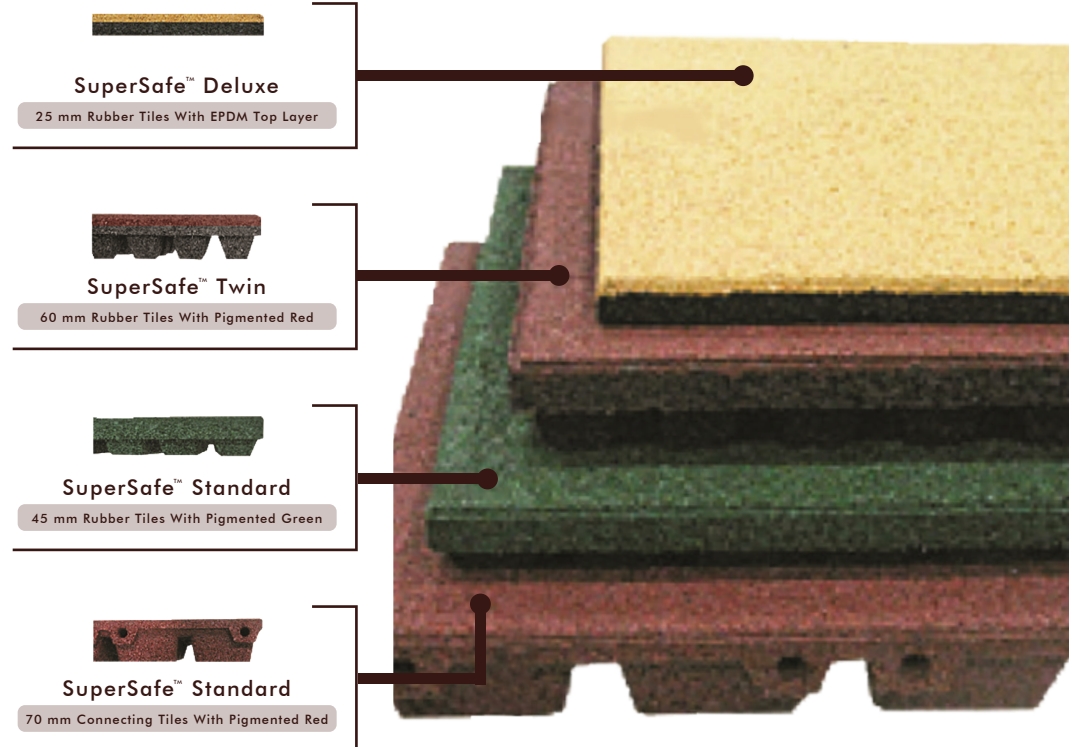

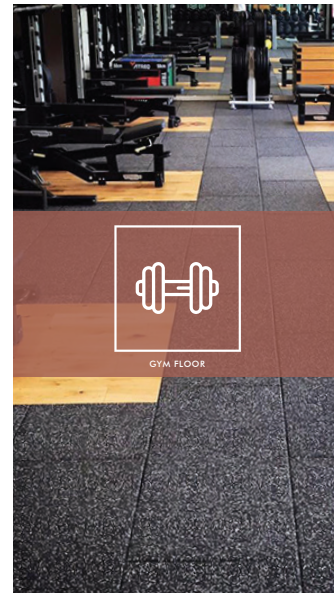

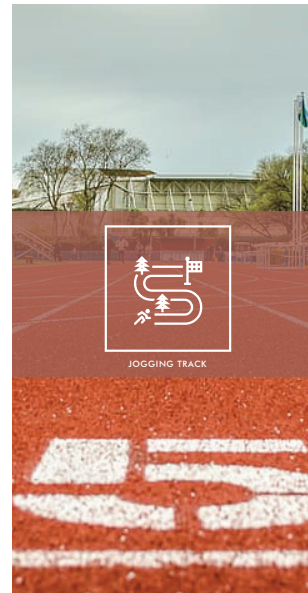

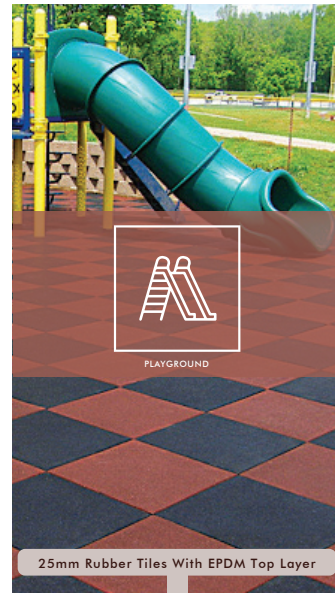

SPECIFICATION

Name	Interlock Rubber Tiles
Dimension	500 mm X 500 mm
Thickness Available	10 mm

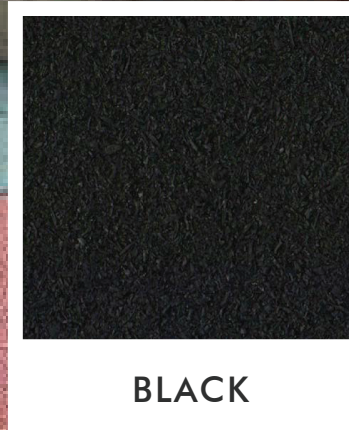

MAINTENANCE

Rubber flooring is very easy to care for. Cleaning rubber flooring generally requires no more than a damp mop (never wet). If you use a cleaning product, check it out with the manufacturer first, as harsh detergents can damage some flooring. Synthetic rubber flooring is generally more stain-resistant than natural rubber. Some types can be polished with a water-soluble wax to make it more resistant to damage and discoloration, but wax must be stripped and reapplied periodically, creating its own maintenance needs.
